## Description Product

Biolubricant base oil of vegetable origin which can be cleaned with water.

## Features and benefits

**BDQ-105** is a biolubricant made from 100% recycled vegetable oil that can be cleaned with water. If it had not been recycled, this oil would have found its way into the environment, via sewers or public waste systems. The use of this product therefore enhances the quality of both ground and air of Canada.

**BDQ-105** is excellent for eliminating rust, tar, dirt and grease (depending on use) while acting as a lubricant. It is used whenever lubrication is required, to increase the lifespan of parts wherever there is a potential problem with friction and/or corrosion. Its penetrating power facilitates undoing of corroded parts and eliminates squeaks in door hinges, etc.

**BDQ-105** is a **100% biodegradable**, non-toxic product that will not harm the environment, in contrast to lubricants derived from petroleum products. It will not dry, crack or evaporate, providing superior protection for extended periods of time

## Applications

**BDQ-105** provides long term protection on steel from rust and corrosion for a variety of industrial, construction, institutional, transportation, agriculture, recreation, marine, mining, aviation, railway and oilfield applications. Special Non-Drying/Non-Hardening formula makes BDQ-105 an ideal lubricant to use on all metal to metal moving parts and surfaces.

**BDQ-105** is an effective lubricant and coating for use on Rollers, Chains, Cables, Wire Rope, Fasteners, Drag Lines, Undercoating, Storage of Wear Parts or anywhere a non-toxic, environmentally friendly lubricant, penetrant, or coating is desired.

- Prevents rust and corrosion
- Non Toxic
- Environmentally safe
- Will not dry, crack or evaporate
- Penetrates and lubricates
- Highly resistant to water wash-out
- Provides long lasting impervious film
- Seals out moisture

### Packaging

20L Pail  
205L Drum

### Chemical and physical Properties

Type	Fluid
Color/Appearance	Clear low odor liquid
Density	0,88 g/cm <sup>3</sup> at 25°C
Viscosity	5mm <sup>2</sup> / sec at 40°C
Water solubility	Insoluble
pH	7.0
Flash Point (ASTM D-1310 C.O.C.)	> 130°C
Biodegradability	21 days, 100% methodology CEC-L-33-A93
Eco-toxicity	None
Toxicity of biodegraded products	0
Health Hazard	0 minimal

### Standard Disclaimer

To the best knowledge of Bio-Lub Canada inc. and any of its affiliated companies (The Companies), Distributors, Representatives or Agents (Others), the information contained herein is believed to be accurate and reliable.
