Description Product

Chain saw oil for summer, based on vegetable oils.

Features and benefits

BDQ-300 is an oil to lubricate the chain saw made from recycled vegetable oil. If it had not been recycled, this oil would have found its way into the environment, via sewers or public waste systems. The use of this product therefore enhances the quality of both ground and air of Canada.

Laboratory studies have shown that vegetable oils have a higher lubricity to mineral oil in the lubrication of chainsaw.

BDQ-300 is specifically formulated to penetrate and lubricate all types of chains. **BDQ-300** adheres and give a protective film chains which reduces friction and increases the useful life of chains. Furthermore, it disperses water and moisture, protects against rust and corrosion. The use of this product after a long period causes no formation of resin.

BDQ-300 is biodegradable, non toxic and does not interfere at any point in the environment because it contains no petroleum products compared to products available on the market today.

Antioxidants are added to the final product to stabilize.

Packaging

3.79 liters

205 gallons

Physical and chemical properties

Appearances and odor : Green liquid mild odor

Boiling point : 235 at 255°C

Flash point : > 200°C

Freezing point : -15°C

Viscosity at -40°C : > 80cP

Solubility in water : Insoluble
